

Moeve strengthens its global standing in its sector, according to S&P's ESG rating

- **Moeve has achieved its highest score in S&P Global's ESG rating, a leading rating agency, ranking first in its sector in terms of sustainability at a European level and in the top three worldwide**
- **S&P has recognized Moeve with the 'Top 5% S&P Global CSA Score' award, acknowledging its excellence in climate strategy, risk and crisis management, and fiscal strategy**
- **The company holds the top position in its sector in other benchmark ratings such as Sustainalytics and Clarity AI and has been recognized by Ecovadis with the 'Gold Medal' award.**

Moeve has established itself as a sustainability benchmark within its sector, earning recognition from leading international ESG rating agencies and being considered 'best-in-class'. In the **S&P Global** Corporate Sustainability Assessment (CSA) ranking, the company has obtained 78 out of 100 points, its highest score to date, after improving by 4 points compared to 2023 and 14 points since 2021. This result places Moeve as the leader in its sector at a European level and among the top three worldwide. In addition, it has obtained the 'Top 5% S&P Global CSA Score' award, standing out for its excellence in climate management, risk and crisis management, and fiscal strategy, where it has obtained the highest scores in its sector.

One of the key factors positively influencing this rating is the company's ambition, as outlined in its Positive Motion strategy, to become a European benchmark in the energy transition and lead sustainable mobility and energy by 2030. Additionally, robust corporate commitments, positive performance in the different relevant sustainability indicators, and initiatives published in the Integrated Management Report have contributed to this milestone.

Carmen de Pablo, CFO and Director of Strategy and Sustainability at Moeve, stated: "At Moeve, sustainability is a strategic priority that integrates the highest standards in all of our operations. We firmly believe that excellence in this area is crucial to achieving our goal of establishing ourselves as a leading benchmark for the energy transition in Europe in this decade. The recognition we have received from independent evaluations not only validates our management capabilities but also strengthens our competitiveness, motivating us to continue progressing with rigor and innovation toward our mission.

For the fourth consecutive year, the company has secured the top global position in its sector in the Sustainalytics ESG Risk Rating, recognizing its exceptional management of ESG risks, and has also been awarded the 'Industry ESG Top Rated' badge. Additionally, Moeve has positioned itself as the company with the highest score in its sector in **Clarity** AI ESG Risk, solidifying itself in the position for the third consecutive year via the evaluation carried out the sustainability technology company."

EcoVadis has awarded Moeve with the gold medal for the second consecutive year, placing it among the top 3% of companies globally out of more than 50,000 evaluated. Notably, Moeve's chemical business has received the platinum medal, achieving a recognition for its transition to more sustainable practices and ranking in the top 1% of its industry. Likewise, according to the **CDP** agency, the company has received a 'B' in climate management, placing it in the "management" category, and an 'A-' in water security, achieving the "leadership" category for the fifth year in a row.

Moeve is a global company comprising over 11,000 employees, committed to sustainable energy and mobility, with the ambition to drive Europe's energy transition and accelerate decarbonisation both within the company and for its customers.

After leading the energy sector as Cepsa for more than 90 years, the company launched its new brand, Moeve, in October 2024. This new identity reflects the acceleration of its transformation to lead in the production of sustainable energy powered by green molecules, including green hydrogen and second-generation biofuels, as well as sustainable chemical products. It is also developing an extensive network of ultrafast electric chargers in Spain and Portugal to boost sustainable mobility.

Through its 2030 Positive Motion strategic plan, Moeve is working to transform mobility and energy to create a better world, ensuring today's energy supply while focusing on sustainable energy solutions for the future.
